January 4, 2000

Dr. Jane Henney, Commissioner
Food and Drug Administration
Rockville, MD

Dear Ms. Henney,

This note is to urge the FDA to follow the lead of the European Union to ban animal uses of growth-promoting antibiotics that are also used in human medicine. The practice has been linked to the emergence of antibiotic-resistant diseases among humans and could become of increasing significance as a major health problem for Americans.

Thank you for attending to this concern.

Sincerely,

Norman Harsh
